
a
The predicted fold is the same
principal axis 2 (Å)
principal axis 1 (Å)
Cα RMSD to wild type
FWAA 0.51 Å RYLE 1.20 Å
b
Confidence does not separate them either
predicted confidence (pLDDT)
residue
VDGV (wild type, 1.00)
FWAA (global optimum, 8.76)
RYLE (dead variant, 0.002)
c
All 146 folded variants
pLDDT at the four sites
log(1 + measured fitness)
RYLE
FWAA
Spearman ρ = +0.21
